The Ultherapy® Skin Lifting Treatment

NON-INVASIVE ULTRASOUND LIFT

Works Naturally
from the Inside Out

Ultherapy®

SEE THE BEAUTY OF SOUND™

Get a Lift and Don't Settle for Less

The Ultherapy® non-invasive lift procedure delivers focused ultrasound energy to the same foundational layer typically addressed by surgeons during cosmetic surgery without cutting or disrupting the surface of the skin.

Not All Ultrasound Treatments are Created Equal

Ultherapy® is the only ultrasound non-invasive skin lifting treatment that went through rigorous assessments and clearance by the US FDA. The product is indicated for lifting the eyebrow, neck and under the chin and smoothen wrinkles on the chest area (décolletage)¹.

Depths Matter

At 3.0mm beneath our facial skin surface, lies the dermis layer that is inherently rich in collagen. At 4.5mm depth, lies the superficial muscle layer of the face (SMAS) which is usually addressed during facial cosmetic surgery. Ultherapy® treatment has been designed to accurately and consistently target 3.0mm and 4.5mm depth at optimal temperature of at least 60°C to create not only effective collagen regeneration and sustainable lifting effect on your skin naturally and non-invasively.^{2,3,4}

“See and Treat”

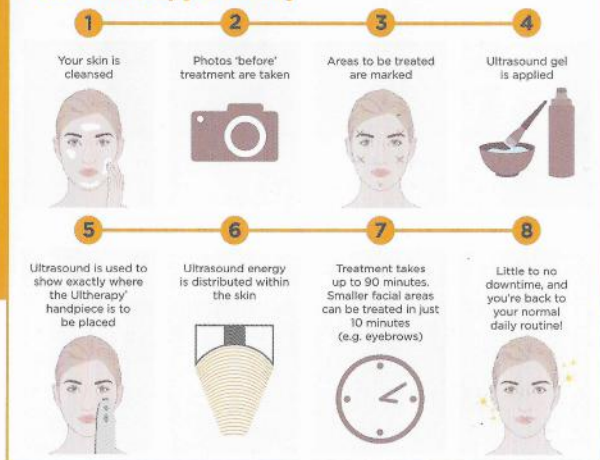

The importance of “seeing while treating” in real time was recognized by US FDA when Ultherapy® received clearance in 2013¹ for the use of its imaging to visualize the dermal and subdermal layers of tissue. This imaging is necessary to ensure proper contact with the skin and confirm the appropriate depth of treatment, such as to avoid bone.⁵

Naturally Lifted for a Year!

Invest only 60 minutes of your time to renew the collagen on your face and get the lift that lasts!⁶

超声波疗程带来看得见的美丽

- 提升眉线
- 紧致颈部肌肤
- 拉提紧致下巴
- 平滑胸部线条

一次非侵入式疗程全搞定

- 无术后恢复期
- 效果自然
- 不含毒素或填充物
- 这就是**超声波疗法**！

Ultherapy™

SEE THE BEAUTY OF SOUND™

唯一获得 FDA 认证的用于提升轮廓
和紧致肌肤的非侵入式疗程。

UL·THER·A·PY

发音为 [阿尔-赛-若-啤], 名词

1. 唯一获得 FDA 认证的用于提升眉线、颈部和下巴皮肤的非侵入式疗程。
2. 聚焦超音波疗程可刺激皮肤深层新胶原蛋白和弹性蛋白的生长。
3. 通过非侵入式疗程提升和紧致皮肤组织, 几乎或无术后恢复期。

见证聚焦超音波疗程的神奇力量: ULTHERAPY 的工作原理

随着年龄的增长, 我们皮肤中的胶原蛋白将不再强韧, 弹性蛋白也开始分解, 皮肤会渐渐变得松弛。皮肤看起来松

弛或是感觉不紧致的人适合采用 Ultherapy。例如, 眼皮下垂、颈部皮肤松弛或胸部皱纹都是疗程对象。

与从外向内穿透皮肤的激光和射频不同, Ultherapy 采用的是由内向外非侵入式提升和紧致肌肤的方式。Ultherapy 绕过皮肤表面, 将超音波能量集中输送到最深 4.5 毫米的深度—与通常进行手术整容的组织深度位置相同。(见图 A)

皮肤对能量的反应将刺激新鲜胶原蛋白和弹性蛋白的产生。聚焦超音波治疗带来美丽蜕变 (See the Beauty of Sound™), 在疗程后 2-3 个月内, 皮肤会得到提升和紧致, 重焕青春健康活力。改善过程会持续 6 个月之久, 并且有患者反映在疗程后超过一年仍能看到改善。

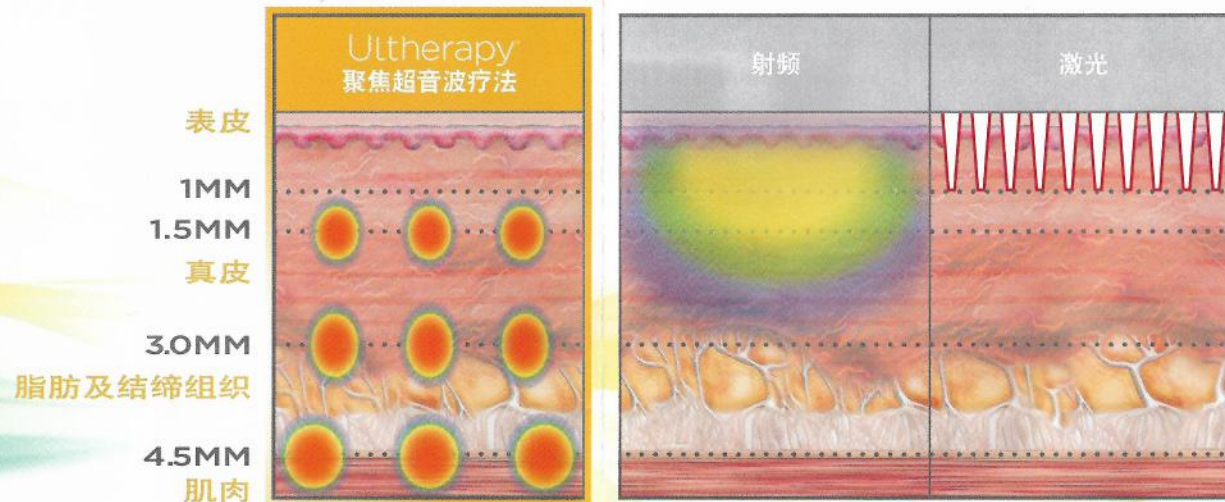

图 A: 不同类型能量的深度和精度对比。

在疗程后的几小时, 您的皮肤可能会有些发红, 比较常见的还有在几天内可能稍有肿胀感, 或者几周后触摸时感到刺痛/酸痛, 这些都属于轻度的暂时性反应。另有一些人在治疗后可能有罕见的异常反应, 例如小范围的临时性淤伤或麻木, 出现这种情况, 疗程师将会为您复查。

见证聚焦超音波疗程的美丽蜕变: 效果显著

疗程效果可以说是立竿见影。我的下颌线立刻得到了提升, 到第 3 个月时, 已经能察觉到颈部以上焕然一新。双眉之间的褶皱完全被抹平, 我不用总在自己脖子那里多看一眼了。”

-Kathleen, 41 岁
